

The Brexit border crossing is changing!

The presentation of an ELO will become compulsory in autumn 2025

The compulsory presentation of ELO will bring changes for all actors involved in border crossings: get informed and anticipate the changes!

What's changing?

- ✓ A unique ELO barcode to be presented
- ✓ Smoother border crossings
- ✓ Improved merchandise tracking

What should I do?

Prepare for the changes by making an account on douane.gouv.fr

From now on:

- ✓ Use ELO for your empty trucks in both crossing directions and for all of your export-bound lorries (EU to UK).
- ✓ Use ELO for imports if you have switched your flows, when required, to ICS2.

The exact date on which ELO will become mandatory will be communicated at a later stage, with adequate notice for preparation.
